Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Ultrasound-accelerated catheter-directed thrombolysis for the prevention of post-thrombotic syndrome

1. De toegevoegde waarde van katheter-geleide trombolysen voor de preventie van posttrombotisch syndroom bij patiënten met een acute iliofemorale diepe veneuze trombose is vooralsnog onduidelijk. *(dit proefschrift)*
2. Een succesvolle behandeling met katheter-geleide trombolysen leidt tot sneller herstel van de levenskwaliteit echter zonder persisterend effect op de lange termijn. *(dit proefschrift)*
3. Het optreden van in-stent trombose is een veelvoorkomende complicatie na veneuze stentplaatsing. *(dit proefschrift)*
4. De kwaliteit van de post-interventionele antitrombotische behandeling beïnvloedt de uiteindelijke behandelresultaten van veneuze stentplaatsing. *(dit proefschrift)*
5. Het huidige selectiesysteem voor de medisch specialistische vervolgopleiding faalt en gaat ten koste van vele talentvolle, enthousiaste en ambitieuze artsen.
6. Voor het behoud van een betaalbare en duurzame zorg van hoge kwaliteit zullen het gezondheidssysteem en de traditionele rol van een ziekenhuis grondig herzien moeten worden.
7. Zowel de zorg als medisch wetenschappelijk onderzoek dient zich te richten op het verkrijgen van de optimale gezondheidswinst, levenskwaliteit en zorgbeleving voor de patiënt.
8. We zijn niet gelijk, wel gelijkwaardig.
9. I can accept failure, everyone fails at something, but I can't accept not trying. *(Michael Jordan)*
10. Find something you love to do and you'll never have to work a day in your life. *(Arthur Schopenhauer)*
11. La vérité vaut bien qu'on passe quelques années sans la trouver. *(Jules Renard)*

Ultrasound-accelerated catheter-directed thrombolysis for the prevention of post-thrombotic syndrome

1. The role of additional ultrasound-accelerated catheter-directed thrombolysis (UACDT) for the prevention of post-thrombotic syndrome in patients with acute iliofemoral deep-vein thrombosis remains uncertain. *(this thesis)*
2. A successful additional UACDT-procedure leads to a faster recovery of quality of life without a persisting long-term effect. *(this thesis)*
3. In-stent thrombosis is a common complication following venous stent placement. *(this thesis)*
4. Treatment outcomes of venous stent placement are influenced by the quality of post-interventional antithrombotic therapy. *(this thesis)*
5. The current selection procedure for medical training programs fails and is at the expense of many talented, enthusiastic and ambitious doctors.
6. In order to maintain affordable and sustainable high quality of care thorough reorganization of the health care system and a re-evaluation of the traditional role of hospitals is necessary.
7. Optimization of a patient's health, quality of life, and health care experiences should be the aim of both healthcare and medical research.
8. We are all different yet equal.
9. I can accept failure, everyone fails at something, but I can't accept not trying. *(Michael Jordan)*
10. Find something you love to do and you'll never have to work a day in your life. *(Arthur Szathmary)*
11. Truth is more valuable if it takes you a few years to find it. *(Jules Renard)*
